North York, ON, Canada | +1 647-860-7198 | adityagaliara@gmail.com | [linkedin.com/in/adityasoftwares-developer](https://www.linkedin.com/in/adityasoftwares-developer) | adig-portfolio.vercel.app

PROFESSIONAL SUMMARY

Full-Stack Software Developer with 5+ years of enterprise delivery experience across Angular, React, Spring Boot, and Node.js — building production systems where I own the full lifecycle from front-end component architecture to cloud infrastructure and CI/CD. Hands-on with Azure (APIM, App Services, Key Vault, Azure SQL, Blob Storage), OAuth2/JWT via MS Entra ID, and Azure DevOps multi-environment pipelines. Experienced delivering government-scale applications with real data complexity — geospatial ingestion via ArcGIS Survey123, multi-environment deployment gates, and security-first API design. Actively integrating AI tooling and LLM-powered features into development workflows to accelerate delivery and expand product capability. I work across the stack and across roles — developer, DBA, DevOps engineer — and I close tickets end-to-end.

TECHNICAL SKILLS

Languages: Java, JavaScript (ES6+), TypeScript, Python, PHP, HTML5, CSS3, SQL

Front-End: Angular (v12–17), React, RxJS, NgRx, Bootstrap, SCSS, Responsive Design, Accessibility (WCAG)

Back-End: Spring Boot, Node.js, Express.js, RESTful APIs, Microservices, JWT, OAuth2/MSAL

Databases: Azure SQL Server, MySQL, schema design, query optimization, indexing

Cloud & DevOps: Microsoft Azure (App Services, APIM, Functions, Key Vault, Blob Storage, Azure SQL), Azure DevOps CI/CD, Git, Maven, npm

GIS & Integrations: ArcGIS Online, ArcGIS REST API, Survey123, Field Maps, ArcGIS token validation

Tools & Methodologies: Agile/Scrum, Jira, Confluence, IntelliJ IDEA, VS Code, Eclipse, Postman, SharePoint, Power Automate

Certifications: Microsoft Certified: Azure Fundamentals | MERN Essential Training | Ethical Hacking: Introduction

PROFESSIONAL EXPERIENCE

Axella Compusoft Inc.

Brampton, ON, Canada

Software Developer (Full-Stack, Cloud & DevOps)

December 2021 – Present

- Architected and delivered full-stack enterprise features using Angular (v12–17) and Spring Boot, serving clients with responsive, WCAG-compliant interfaces and RESTful API backends.
- Designed Azure SQL Server databases from scratch including schema design, normalization, indexing strategy, and ongoing performance tuning for production workloads.
- Built and managed Azure infrastructure (App Services, API Management, Functions, Key Vault, Blob Storage) with stage-based APIM policies supporting DEV/IST/UAT/PRD multi-environment deployments.
- Created and maintained Azure DevOps CI/CD pipelines (Maven, Node.js, Angular) automating build, test, and deploy stages with environment gates and rollback strategies.
- Implemented OAuth2 and MSAL authentication in Angular with JWT token management; configured endpoint whitelisting and ArcGIS token validation for secure server-side API access.
- Integrated ArcGIS platform (ArcGIS Online, Survey123, Field Maps, REST API) into Azure-hosted enterprise applications, bridging geospatial data ingestion with backend business logic.
- Contributed to mobile application development hosted on ArcGIS IaaS, ensuring seamless integration with Azure-based APIs and enterprise data pipelines.
- Acted as DBA, DevOps engineer, and cloud lead — bridging infrastructure provisioning and application development for end-to-end delivery within Agile/Scrum teams using Jira, Confluence, and Azure DevOps.

TD Bank

Toronto, ON, Canada

Website Developer (Contract)

June 2023 – September 2023

- Developed a use-case management platform from scratch on SharePoint, tailoring components to project and end-user requirements following information architecture best practices.
- Implemented Power Automate workflows to automate data flows and approval processes, improving operational efficiency across internal business units.
- Performed website maintenance, applied security patches, conducted regular backups, and provided technical support to end-users — maintaining SLA compliance throughout.
- Collaborated with cross-functional teams to gather requirements and propose platform improvements, contributing insights from active troubleshooting to new platform planning.

R.K. Enterprise*Web Developer***Vadodara, India***January 2020 – June 2021*

- Developed, customized, and maintained WordPress websites using HTML, CSS, JavaScript, and PHP; ensured code quality and cross-browser compatibility.
- Built and maintained Power Automate workflows for business process automation including data entry, document management, and multi-step approval processes integrating SharePoint and Dynamics 365.
- Optimized workflow performance and security using Power Automate's AI Builder for sentiment analysis and object detection capabilities.

NOTABLE PROJECTS

Enterprise Application for Field Survey System**Axella Compusoft Inc.**

- Full-stack enterprise platform built for OMAFRA (Ontario Ministry of Agriculture) on Angular + Spring Boot + Azure (AFD, APIM, App Service, Key Vault, Azure SQL, Blob Storage).
- Owns end-to-end delivery: front-end form workflows, RESTful API layer (APIM-gated), database schema, Azure DevOps CI/CD pipelines, OAuth2/JWT via MS Entra ID, and ArcGIS Survey123 integration for geospatial soil survey data ingestion.
- Manages multi-environment deployment lifecycle (DEV → IST → UAT → PRD) with environment gates and rolling deployment strategy.

EDUCATION

Conestoga College*Graduate Certificate – Web Design and Development***Ontario, Canada***May 2021 – August 2022***Sardargunj Mercantile Co-op Bank College of Commerce & Management***Bachelor of Commerce – Computer Programming & Applications***Vallabh Vidyanagar, India***2016 – 2019*
